BUYING A HOME? BUYING PROPERTY TO BUILD A HOME?

What to consider before buying a home or building a home.

1. Is the lot large enough for all of my future plans?
2. Are there zoning regulations or building permits?
3. Is there an existing drainage easement or is a drainage easement necessary?
4. Are there any existing underground utilities?
Call Ohio Utility Protection Service 800-362-2764.
5. Is there floodplain or a floodway on the property?
6. Will a windbreak planting be necessary?
7. Are there any existing contamination concerns (manure piles, sink holes, oil wells, buried fuel tanks, etc.)?
8. What is the depth of soil to bedrock (is a basement possible)?
9. How do I get an address?
10. How do I get a driveway culvert?

Water Supply

1. What is available for drinkable water?
2. Will extra treatment (water softener, disinfection, etc.) be necessary for the water supply?

Wastewater Treatment

1. Is sanitary sewer available or is an individual household sewage treatment system necessary?
2. Can a household sewage treatment system be installed on this property?
3. Where can the sump pump & downspout water be drained to?

Future plans for the property

1. Patios or decks
2. Outbuilding, pole barn, shed, etc.
3. Windbreak planting
4. Pool or pond
5. Geothermal heating system
6. Farm animals

SANDUSKY COUNTY PUBLIC HEALTH

CHECKLIST FOR APPLICATION FOR A NEW OR REPLACEMENT SYSTEM

SOIL EVALUATION:

- Properly completed Site & Soil Evaluation form for each soil boring location (include GPS coordinates) - minimum of 2 locations, if shallow soil depth to bedrock additional locations may be required
- Provide site descriptions to include: slope, vegetation, drainage features, rock outcrops, erosion and other geological features, or risks for potential ground water contamination

DESIGN PLAN CHECKLIST

A household sewage treatment system design plan must include...

- Site plan drawn to scale 11X17 (minimum)
- North orientation arrow
- Locations of existing or proposed dwellings/structures (house, barns, pool, driveway geothermal heat systems, etc.)
- Location of all existing or proposed private water systems, surface water features on property or neighboring property within 50 feet of the property lines
- Location of any easements or right of ways
- Location of any wetlands or 100-year floodplain on the property
- 2 locations with adequate contour length (primary & replacement areas)
(in presence of bedrock additional locations may be required)
- Layout elevations corresponding to at least 2 flagged locations at the site
- To prevent soil compaction, indicate how area will be protected during construction
Horizontal isolation distances

It is recommended that the designer work closely with the property owner in order to explore all available system options before deciding on the design that is submitted for review
