Case counts include the number of disease reports received throughout the month of September 2026. Disease and Case Inclusion Criteria: Suspect, Probable, and Confirmed.

Key Finding Comparisons/Special Notes

- One **suspected measles** case was investigated during the reporting period and is included in the total case count. The case remains classified as suspected because only antibody titers were obtained and PCR testing was not performed; no further public health action was taken following receipt of the positive antibody result.
- Measles information and resources for healthcare facilities was emailed out to partners on 9/21/26.
- Updated healthcare personnel guidance for viral respiratory infections was emailed to LTCF's on 9/24/26.
- The start of influenza season began September 28, 2026 (Week 40). Please visit our website to report weekly flu numbers. <https://www.scpublichealth.com/communicable-diseases>
