

# Food Safety Newsletter

Welcome to our quarterly newsletter to stay updated on news, reminders, and more from Sandusky County Public Health. This is the July to September issue.

## COMMON VIOLATIONS

Our Inspectors commonly see in operations is lack of date marking foods. Our code states refrigerated, ready-to-eat, time/temperature controlled for safety food prepared and held for more than 24 hours is to be marked to indicate the date the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41° F or less for a maximum of seven days. The day of preparation is counted as day one.

## NEW STAFF

As some may know, we have been transitioning over to new staff. We welcome our new Director of Environmental Health, Nina Johannsen, who took over in February after Martha Bowen retired.

## REMINDER

If your facility is planning on renovating, remodeling, or getting new equipment, talk to us first! We need to approve of any changes to your facility before you make them!
