# SAVE LIVES
Get the vaccine

COVID vaccines are safe and save lives

COVID vaccines are tested and safe. If more people get the COVID vaccine, the better chance we will have of slowing further infection, preventing needless deaths, and ending the pandemic.

There are three vaccines — all work

There are three different COVID vaccines currently in use in the U.S. The Moderna and Pfizer vaccines require two doses taken 3-4 weeks apart. The Johnson & Johnson (or Janssen) vaccine requires one dose. Talk to your healthcare provider about which vaccine is right for you.
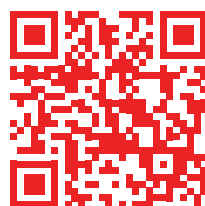

Make an appointment

No matter which vaccine you choose, the important thing is to take it. **The vaccine is free and will be given to anyone who is eligible to receive it and makes an appointment.** To receive the vaccine, you must schedule an appointment online at **gettheshot.coronavirus.ohio.gov**, or call the number below if you need assistance.
