Case counts include the number of disease reports received throughout the month of October 2024 with the exclusion of COVID-19. COVID-19 case data is pulled by event date (onset date OR specimen collection date, whichever is earliest). Disease and Case Inclusion Criteria: Suspect, Probable, and Confirmed.

Key Finding Comparisons/Special Notes

- 9.8% of COVID cases were hospitalized.
- There were three new COVID (long term care facility) outbreaks reported in October.
- The Salmonellosis case was caused by Salmonella serotype Typhimurium.
- Attached is the Influenza Surveillance Summary for MMWR Weeks 40-44.
- LTCFs, Physicians, and Schools can visit our website to report weekly flu surveillance numbers.
